

Goodbye Again

We thought it was just another day
A winter day just like any other
How could we have known
That you'd be taken away

Snatched away without mercy
Gone without a warning

I heard your laughter from
The phone that day
It filled the air
The way it always did

You always said that we
Had met before
Perhaps in a coven
'Neath the full moon shinin'

I know that I will see you there
Someday again...

I can see us there at harvest time
Dancin' round the tree of life
Orange fire blazin'
Watch it kiss the sky

And I know that it is time
For me to kiss you goodbye...

So I'll blow a kiss to you
My lovely peacock queen
Until we meet again
You'll be on my mind

I must wipe the tears away
There is no need to cry
Just stay in the moment
Until we meet, 'til we meet again...
